

LIP MASTERCLASS

THANK YOU FOR YOUR INTEREST IN OUR LIP MASTERCLASS,
HERE'S ALL THE INFORMATION YOU'LL NEED TO LEARN WITH US.

OUR SPECIFICATIONS

To be eligible for our lip masterclass you **MUST** be a trained medical professional with a minimum of one years experience within the cosmetic fillers industry. We also can only take on students who have already completed their foundation filler course, and are able to provide their medical pins upon booking. Please also note that this class is **SPECIFICALLY** for lip augmentation training, and no other areas of the face are included in this course. If you're interested in learning more than just lips, please visit our website to view our vast selection of other courses available.

WHY TRAIN WITH US?

Here at Essex Aesthetics, we aim to offer comprehensive and up to date education on the continuously developing aspects of aesthetic medicine. We pride ourselves on offering tailored training to intimate classes, with a 2:1 delegate trainer policy, with our course content following the HEE Guidelines at level 7.

If you want to make your mark in the rapidly expanding and lucrative world of aesthetic medicine, we're here to help. Our new bespoke, unrivalled and unique cosmetic training courses provide the latest in 21 st century techniques and are among the only of their kind in the UK. We offer training to the following professionals;

- Nurses
- Doctors
- Midwives
- Pharmacists
- ODP's

Paramedics & other medical professionals. Please enquire if your profession is not listed.

WHAT YOU'LL LEARN

Master the art of lip augmentation, with our bespoke & tailored injection techniques. For students who have completed the basic dermal filler training, or established aestheticians looking to refresh and update their lip skills this is the course for you. With lip filler being the most sought-after aesthetic treatment on the market, this course will allow you to learn 10 of the most advanced, unique techniques in the industry. This class also covers lip anatomy, consultation & assessment and managing complications.

We provide delegates with a comprehensive lip filler masterclass course presentation to refer back to after training.

- Microdroplets
- Nano Tenting
- High Definition Lip
- 4D Cupid Bow
- LipSculpt
- Jolie Lip
- Lip Contouring
- Philtral Columns
- Sad Smile Correction
- Lip Lift

WHY WE'RE DIFFERENT

We don't just offer training on the day. With our complete training schedule, you will receive 20 hours pre-course study to help build knowledge and confidence prior to the course. Theory is revised again on the training day to bring your pre-study to life, and further in-depth teaching is completed on the day.

Our training is different due to the intensity of learning involved. We cater specifically for medical professionals and can therefore proceed with hands on injecting. We guarantee each delegate a minimum of 6 models each for every module, whereby your academic skill and acquired knowledge is put in to practice.

We will shadow, critique and advise to ensure you leave feeling confident and prepared to begin your aesthetic career. We do not believe in teaching on dummies and believe that the only way to gain experience and confidence is to become hands on. Practice makes perfect, and we want you to be the best you can be!

As our training is tailored to your preference, we are able to assist novice injectors to established aestheticians. If you are new to the industry, or simply feel like you need a refresher we can provide you with the most comprehensive and relevant training.

WHY WE'RE DIFFERENT

With a combined total of 10 years in the aesthetics industry, there is no tip, trick or skill we aren't aware of. All educators have thriving aesthetic businesses and work full time in the industry. There isn't a complication or adverse event we haven't dealt with and pride ourselves on experience. We have been in your position and being an independent practitioner can be daunting for the most confident of professionals.

We offer continuous support, and access to a forum to speak and engage with other aesthetic practitioners. For non-prescribing medics, we provide access to a list of reputable prescribers to work with. For the prescribing medics we offer clinical guidance and legislation required for prescribing in a new medical field. No stone is left unturned – from waste management to social media management we aim to prepare you for every aspect of your cosmetic career.

FURTHER SUPPORT

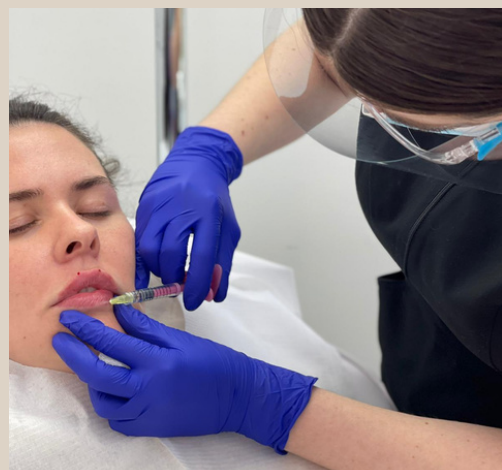

- Business start up...

We provide you with the knowledge, ability and tools to prepare for the legal and administrative aspects of cosmetics. Our training and information given meets the requirements of Save Face Accreditation, and we provide you with the tools and skills to become a Save Face Accredited Practitioner.

Save Face is a national register of Accredited practitioners who provide non-surgical cosmetic treatments such as + and dermal fillers. Their Register is accredited by Professional Standards Authority and is recognised by the Government, The Department of Health, NHS England and The Care Quality Commission.

- CPD Accredited...

Our course is CPD accredited and can be used towards your revalidation within your regulatory body (GMC, GDC, NMC). Our training and certification also guarantees you cover with the most popular and trusted cosmetic insurance provider, allowing you to practice securely with fantastic cosmetic liability insurance at an affordable premium. Each course allows you 8 CPD hours toward your professional revalidation.

OUR MISSION STATEMENT

We want you to know our passion is to ensure the professional development of medical professionals within aesthetics. We aim to provide you with the quality evidence required to make professional decisions when choosing the treatment options and areas for your clients. In doing so, we aim to have a positive impact on aesthetic practitioner standards within the industry.

Our main tutor Michaela began her aesthetic career 9 years ago and started as an advanced level 3 beauty therapist, offering non surgical treatments including – facial and body electrical treatments (EMS) and epilation, as well as all aspects of beauty therapy. During this time Michaela developed a passion for the anatomy behind these treatments and decided to further her studies at University, attaining a Bachelor of Science in Adult nursing in 2012.

Michaela initially started her nursing career in the Emergency Department, developing her resuscitation skills in the challenging critical care setting. After eventually leaving the NHS after 2 years and pursuing an Aesthetics Career, Michaela merged her acquired critical care knowledge with beauty and cosmetic medicine, ensuring all clients receive the highest calibre of care.

Having attended over 6 different Aesthetic training courses all over the U.K from Harley street to Wales, Michaela felt that there was a real issue within the poorly regulated industry, especially in regards to training.

OUR MISSION STATEMENT

Michaela used her poor experiences to guide her next venture and in 2018 embarked on a teaching course. With a level 3 diploma in teaching and education, she can now professionally share her acquired skill and knowledge with her peers, in an accredited and professional setting.

With 3 years' experience in one of the South East's most popular clinics, Mikala has treated well over 10,000 patients and mentored 20+ newly trained nurses. Her experience has proved invaluable in treating and recognising vascular complications, and she has developed a multitude of techniques to achieve the most aesthetically pleasing results in a safe and mindful fashion.

Her training courses leave students feeling confident and empowered to perform non-surgical cosmetic treatments at a high-ranking standard. Her personal input and continuous support leaves no stone unturned, ensuring competence and safety for both students and their patients.
